

## STATOR AND ROTOR TESTER

**DL 1010E**

Electronic instrument for testing rotors and stators. Complete with separate power supply unit. Very simple to use thanks to a clear optical and acoustical indication. No need for calibrations. Inductive test without connecting cables.

## RESISTIVE LOAD

**DL 1017R**

Single or three phase resistive step variable load. Max. power: 3 x 400 W
