

# WORK BENCHES FOR ELECTRIC INSTALLATIONS

**GRID PANEL**

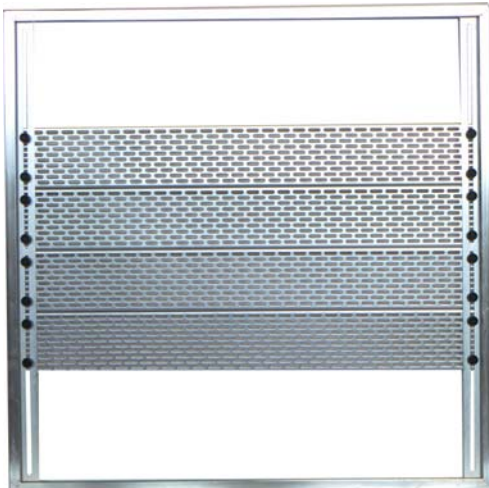

**DL 1100D**

Perforated sheet panel, thickness 1.6mm., hole diameter 6mm., centres 12mm. Suitable for remote controls of industrial installations; the assembling of the components is easy and fast, as well as the fixing of the panel to the work bench by means of the holes at the corners. The panel is properly treated to be rust proof and then zinc-coated.

Dimensions: 80x80x2 cm.

**STRIP PANEL**

**DL 1100E**

Metal frame complete with 4 vertically moveable slotted strips. Suitable for assembling industrial installations, it can be easily adapted to the fixing centres to centres of the components to be wired. The frame is properly treated to be rust proof and then zinc-coated.

Dimensions: 80x80x4 cm.

**PANEL HOUSING CABINET**

**DL 1100N**

Container for panels with hinged doors, suitable for housing up to 6 panels with unfinished wiring. Made in polished steel plate and fire-varnished after rust-proof treatment; provided with central key lock.

Dimensions: 125x89x88 cm.

**CABINET**

**DL 1100H**

Two-faced, 4 compartment central cabinet with key lock for DL 1101, DL 1103 and DL 1104 work benches.

Dimensions: 36x76x72 cm.
