

DL 2101TH – VIDEO INTERCOM

This system studies the topics related with a intruder alarm system in the electrical civil installation. It has a modular structure and it consists of didactic panels installed on a vertical frame.

The modularity of this didactic system grants to the students a direct and immediate approach to the topics, offering the opportunity to study various subjects performing several experiments. In this section the following devices are studied:

- Signalling bell
- Signalling bell and plate lighting
- House-phone
- Outdoor video station
- Video/house-phone
