

DL 3155BRS–M24

Kit for the study of microcontrollers

Composed of:

- Sub-module with PIC16
- Sub-module with PIC18
- Sub-module with PIC24
- Sub-module with PIC32
- Sub-module with digital IN/OUT
- Sub-module with sensors
- Sub-module with D/A – A/D converters
- Sub-module with memory (EEPROM & RAM)
- Sub-module with motor control
- Sub-module with IN/OUT optoisolator
- Sub-module with SPI + UART interfaces
- Sub-module with LCD display
- Sub-module with TTL IN/OUT
- DL 3155BRS development module
- Power supply

The kit is **complete with the DL 3155BRS development module, the Debugger/Programmer and the application programs** suggested in the manual.

The kit is supplied in a **carrying case** for easy transportation and storage.

Suggested instrumentation: *multimeter, oscilloscope*

The kit is complete with theoretical and experiment manual.
