

## DL 3155BRS–BDE

### Kit for the study of digital electronics

**Composed of:**

- Sub-module with 4 AND gates and 4 OR gates
- Sub-module with 4 NAND gates and 4 NOR gates
- Sub-module with 4 EXOR gates and 6 NOT gates
- Sub-module with latch & buffer circuit
- Sub-module with Flip-Flop JK Master Slave
- Sub-module with Flip-Flop D Master Slave
- Sub-module with up/down counter
- Sub-module with shift register
- Sub-module with 7 segment display
- Sub-module with multiplexer and demultiplexer
- Sub-module with oscillators
- Sub-module with 555 timer circuit
- Sub-module with input/output digital probes
- DL 3155BRS development module
- Power supply

**Suggested instrumentation:** multimeter, oscilloscope

**The kit is complete with theoretical and experiment manual.**
